

DUO BALE LIFTER

The Nugent Duo Bale Attach joins the robust, versatile range of Bale Handling Equipment. The Nugent Dual Bale Attach allows wrapped bales to be moved safely and efficiently. Using two Heavy Duty Bale Lifters, the Attach allows independent movement of each lifter for simple collection. The Bale Lifters can be dismantled in minutes and attached directly to the back of a tractor on 3-point linkage.

The Nugent Duo Bale Lifter will lift the first bale of the ground to protect it whilst lifting the second bale. This is not a unique feature as other products on the market have done this previously. However, what is unique is that not only does the Nugent Duo Bale Lifter lift to protect the bales and lifts both bales, it also trips them in the traditional tipping format which allows the farmers to not only lift two bales at a time but to stand them up on their end.

As opposed to buying a whole new implement for your farm the Duo Bale Lifter is made up of the Duo Bale Attach and two existing standard bale lifters. If the customer already has an existing Nugent Bale Lifter, it can be retro fitted onto the coupling. If a farmer is only using a twin bale lifter in the summer to draw bales in from the fields but in the winter during the feeding season, he only needs a single bale lifter, the single bale lifters can be detached and used on their own quite easily.

BALE HANDLING EQUIPMENT

Bale Spike

The Nugent Bale Spike is built on 3-point linkage. It is fitted with one 39" stone-fork tine and two small 12" stabilising tines.

- Affordability and simplicity leaves this an essential piece of equipment for any farmer
- Has the strength and durability to carry large bales
- 3-point linkage as standard

Bale Grab

The Nugent Bale Grab is of robust construction throughout and is equipped to carry even the largest of bales.

- For fast efficient movement of bales
- Two hydraulic arms that open out
- Ability to fix one arm for stacking in those awkward places
- Perfect for stacking bales and dropping bales into high feeders
- Can be attached to any front loader

Universal Bale Spike

The Nugent Universal Bale Spike comes standard with 3-point linkage brackets, but is also suitable to be fitted to any front loader. The Universal Bale Spike has two 39" stone-fork tines, leaving it more suitable for long distance journeys.

- Suitable to be fitted to any front loaders
- Efficient for long journeys
- 3-point link as standard

Heavy Duty Bale Lifter

The Nugent Heavy Duty Bale Lifter was initially designed for contractors, so it is of heavy construction, equipped to carry even the largest of bales and is a highly popular piece of bale handling equipment within the farming industry.

- The newly designed A-Frame will fit even the largest of tractors with ease
- The new innovative design leaves it one of the strongest yet affordable on the market
- Spring loaded trip mechanism for standing the bale on its end
- 3 point linkage as standard

Hydraulic Bale Stacker

The Nugent Hydraulic Bale Stacker is of robust construction throughout and is fitted with spring steel tines so it can carry two bales of straw. Hydraulically operated 90mm revolving arms softly cradle bales and ensure no film damage when clamping.

- Rotating rollers ensure no film damage when clamping
- Frame will accept optional brackets for use on any front loader
- Fitted with spring steel tines so it can carry two bales of straw
- Hoses supplied separately

Twin Bale Lifter

The Nugent Twin Bale Lifter is designed for contractors or farmers with the larger type tractor. Made from heavy duty box section, its strength and reliability are second to none. Fitted with a hydraulic tipping mechanism, it cuts time and effort for the farmer, therefore making it a popular and efficient piece of machinery to have in any farm yard.

- Strength and reliability to carry two of the largest bales
- Constructed from heavy duty box section
- Hydraulic tipping mechanism
- Reduces time and effort to the farmer
- 3 point linkage as standard
